* ACUVUE® 2 does NOT contain PVP. * All ACUVUE® contact lenses have Class 1 or Class 2 UV-blocking to help provide protection against transmission of harmful UV radiation to the cornea and into the eye. UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. UV transmission measured with -1.00 lens. ** Filtering of HEV light by contact lenses has not been demonstrated to confer any systemic and/or ocular health benefit to the user. *** Oxygen transmissibility at centre of a -3.00D lens using boundary corrected, edge-corrected Dk values. Units: (cm/sec) (ml O2/ml x mm Hg) at 35° C. Dk determined via polarographic method. + Helps protect against transmission of harmful UV radiation to the cornea and into the eye. * ACUVUE® OASYS MAX 1 Day has a unique blue-green appearance as a result of the combination of the blue-violet/high energy visible (HEV) light filter and the blue handling tint.

New EU-MDR compliant labeling design shown - transition taking place during 2023/2024.

Important Safety Information: ACUVUE® Contact Lenses are indicated for vision correction. As with any contact lens, eye problems, including corneal ulcers, can develop. Some wearers may experience mild irritation, itching or discomfort. Contact lenses should not be used in case of eye infections or any other eye conditions, or in case of a systemic disease that may affect the eye. For complete information, including contraindications, precautions and adverse reactions, please consult the Instructions for Use or visit our J&J website www.jjvisionpro.co.uk.
